PROFILE

Frontend Developer with 5+ years of experience building production React and TypeScript applications. Experienced in maintaining a shared frontend platform used across multiple web products, developing reusable UI components and collaborating directly with product designers. Hands-on experience with Storybook, Shadcn UI, Vite, SCSS, Redux Toolkit, i18n, and component-driven development.

WORK EXPERIENCE

august 2025 - present
Remixshop
Frontend Software Engineer

- Contributed to a shared React and TypeScript frontend platform consumed by multiple web applications, including the main shop, customer account and internal products.
- Used Shadcn UI components and compositional patterns in an internal warehouse application.
- Collaborate directly with product designers in Figma to translate responsive designs, component variants and interaction states into production-ready interfaces.

march 2021 - july 2025
Amdocs
Advanced Frontend Software Engineer

- Developed and maintained production React and TypeScript applications for a large telecom customer within a cross-functional Agile team.
- Worked directly with client-side product to clarify requirements, investigate production issues and deliver reliable solutions.
- Used Storybook to develop, document and review reusable UI components and their variants.
- Progressed from Software Engineer Intern to Advanced Frontend Software Engineer.
